## Summary

Fullstack developer focused on backend engineering using **Node.js** and **TypeScript**.

Experience building **REST APIs**, SaaS systems, and scalable web applications.

Background in **React**, **Next.js**, and relational database design.

## Core Technologies

**Backend:** **Node.js**, Express, NestJS

**Frontend:** **React**, **Next.js**

**Languages:** JavaScript, **TypeScript**, Python

**Databases:** **PostgreSQL**, MySQL

**Concepts:** **REST APIs**, SaaS, Software Architecture, SDLC

## Experience

- |                                                                                                                                                                                                                                                                                                                                                                                                        |                                         |
