Professional Summary

Fullstack Developer mostly focused on the backend, with more than 3 years of experience in the development of web applications and scalable and modular APIs. Prioritizing clean code and good practices, passionate about solving different problems and always seeking continuous improvement and understanding of how systems work. I adapt easily to all kinds of challenges and environments, as well as to multiple technologies.

Education

Computer Systems Engineering | Instituto Tecnológico de Morelia Aug 2020 – Dec 2025

Engineering - Morelia, Michoacán

Focus on software development, databases and API design, with special interest in data architecture and good programming practices.

- Proficiency in languages such as Java, Python, Kotlin, C#, JavaScript and PHP.
- Practical experience in modern frameworks such as Next.js, NestJS, React and Laravel.
- Participation in software engineering projects applying object-oriented paradigms and fullstack web development.

Computer Equipment Support and Maintenance Technician | CECYTEM Puruándiro Aug 2013 – June 2016

Technician - Puruándiro, Michoacán

Technical training in computer equipment maintenance, hardware diagnosis and networking fundamentals.

- Preventive and corrective maintenance of computer equipment and local networks.
- Fundamentals of electronics, basic programming and diagnosis of hardware failures.

Professional Experience

ABV Electric Supply, Fullstack Developer Morelia, Michoacán

Feb 2025 – present

- Development and optimization of APIs using Django and PostgreSQL, ensuring data integrity and efficiency.
- Integration between backend and frontend through Django templates, focusing on delivering a smooth and functional user experience.
- Active collaboration with the team to define technical requirements and ensure readable, scalable and maintainable code.

Freelancer Projects, Fullstack Developer

Morelia, Michoacán

Development of customized management systems for local businesses, adapted to their processes and specific needs.

Jan 2023 – Jan 2025

- Design and development of administrative systems and points of sale using modern stacks such as React and Express.
- Implementation of relational databases in PostgreSQL and MySQL, ensuring data consistency and integrity.
- Delivery of complete solutions: design, development, deployment and technical maintenance of applications.

Power Energy, IT Support and Internal Development

Puruándiro, Michoacán

Responsible for technical support and maintenance of computer equipment, as well as internal development of a management system for administrative control of the establishment.

Feb 2020 – Jan 2025

- Design and implementation of an internal management system to replace spreadsheets, automating administrative processes.
- Preventive and corrective maintenance of the hardware and software used in the office.
- Direct attention and technical support to staff, ensuring continuity of daily operations.

Certifications

- Responsible prompting - maximize AI in your business (Santander Open Academy, 2025)
- Introduction to AI (Google, 2025)
- Legacy Responsive Web Design V8 (freeCodeCamp, 2023)

Projects

Personal portfolio

Jan 2025 – present

Personal page as a developer, created with Astro and focused on the pure use of HTML, JS and CSS to reinforce web fundamentals.

- Responsive design and consistent aesthetics with my personal style.
- Performance and SEO optimization.

FinGuardian

Jan 2025 – present

Fullstack application for managing expenses, income and savings, created with Express and React, integrating artificial intelligence functions.

- Modular and scalable backend with Express and Node.js.
- Modern and smooth interface created with React and Tailwind CSS.

Research Project Management System

Jan 2025 – present

System under development for the administration of projects and students of the technological research department of the Instituto Tecnológico de Morelia.

- Architecture based on RESTful APIs and relational database.
- Interface design aimed at improving the productivity of academic staff.

Skills

Programming Languages: Python, JavaScript, TypeScript, SQL, PHP

Frameworks and Libraries: React, Next.js, FastAPI, Flask, Django, Tailwind

Tools and Technologies: Git, GitHub, Docker, RESTful APIs

Databases: PostgreSQL, MySQL, MongoDB

Operating Systems: Windows, Linux
